### POST-TREATMENT INSTRUCTIONS

#### General

- Apply broad spectrum sunscreen, 3 times a day (7 am, 12 pm and 2 pm).
- In rare cases swelling can be present; patients can take antihistamines such as Claritin/Zyrtec to alleviate symptoms.

#### After 3-5 Days

- Topical treatments and skin care dermo-cosmetic products can be resumed.

#### For 7 Days

- Strict avoidance of sunlight.
- 

### HEALING AND RESULTS

- Erythema and mild edema should be expected immediately after the session lasting at least 2 days, with subsequent darkening and skin peeling for 2 to 3 days.
